## Drivers For Wd External Hard Drive

I believe the wrong default driver is downloading??Wd External Hard Drive Drivers For Windows 7Did you come up with a solution?? Thank you, Jason.. I was trying to update the firmware and THE FIRST TIME I PLUGGED IT IN, IT RECOGNIZED IT CORRECTLY and the device also came up in the WD Smartware software.. I believe the wrong default driver is downloading?? Did you come up with a solution?? Thank you, Jason.. After installing Windows 10 Preview and trying the drive it could not be recognized.. Michael, did you ever find a solution to this?Wd External Hard Drive Drivers For Windows 7Drivers For Wd External 1tb Hard DriveI have a WD 500GB external hard drive that is not being recognized by my computer anymore.. Michael, did you ever find a solution to this? I have the exact same problem Computer recognizes a device is plugged in but comes up as Initio Default Controller in connected devices.. I was trying to update the firmware and THE FIRST TIME I PLUGGED IT IN, IT RECOGNIZED IT CORRECTLY and the device also came up in the WD Smartware software.

Now, it does not come up anywhere, Windows makes the sound that a device has been connected but, Initio Default Controller comes up in Connected Devices and nothing comes up in the WD Smartware program.. The drive was working until shortly after installing Windows 10 Preview I did not use it every day so at least I didn't notice it until then.. It just stopped working When I plug the USB cable in, Windows recognizes that the device is there, and says that it has installed the appropriate software for the device and it is ready to use.. Sky kingdom map minecraft It seems to be clobbered, at least I am starting to think so.. Click to expand I believe the problem I am having may be related to the firmware or drive itself.. Drivers For Wd External 1tb Hard DriveNow, it does not come up anywhere, Windows makes the sound that a device has been connected but, Initio Default Controller comes up in Connected Devices and nothing comes up in the WD Smartware program.. I eventually tried it on my wife's windows 7 system and again on my office windows 8 system and the drive is not seen and I can't therefore install the latest firmware since3 it doesn't know it even exists.. However, the drive I have the exact same problem Computer recognizes a device is plugged in but comes up as Initio Default Controller in connected devices.
